

The telephones are ringing, the FAX machine is jammed, and the doorbell is buzzing. How can anyone be expected to manage all that with just two hands?

Norstar Doorphone

AT LAST, THE PHONE THAT “ANSWERS” YOUR DOOR.

A big part of the answer is the stylish Norstar* Doorphone.

MORE THAN A DOORBELL.

MORE THAN AN INTERCOM.

The Norstar Doorphone is like having your own personal door attendant. And that means you can talk directly with visitors using integrated voice technology. Even open a locked door right from your Norstar telephone. It's the secure, easy-to-use answer you need to manage traffic. Anytime. And under any conditions.

THE “SMART” DOORBELL.

Up to four Doorphones can be added to your Norstar. And when a visitor presses the Call button on your Doorphone, the Norstar system automatically “knows” which phone, or phones, in your office to ring. What's more, the LCD Window on your Norstar telephone displays which Doorphone is calling. You can then receive your visitors with a personal greeting over the intercom. Or if you're away from

your desk, the Doorphone will call the alternate telephones you've selected.

HANDY DOOR OPENING. AND MORE.

By adding the optional Door Opening Controller (DOC) to the Doorphone, any Norstar telephone can control a latch on a door or a gate. Simply press the softkey below OPEN in your LCD Window. And voilà! The door opens.

AT LAST, THE PHONE THAT “ANSWERS” YOUR DOOR.

Fact is, up to twelve DOC's may be connected to each Norstar Doorphone. And each controller can operate a different electrical device in your office. You'll discover even more ways to take advantage of the Norstar Doorphone, including:

- After-Hours Visitors Voice Mailbox
- Security-Video Surveillance Cameras
- And Remote Activation of Electrical Equipment

PLUG IT IN AND LET IT ANSWER.

Simply plug the Doorphone into one of your Norstar telephone ports, and you're done. That's all there is to it. Not only is the Norstar Doorphone a snap to install, but it fits professionally into your business and comfortably into your life. Available in stainless steel or brass face-plates to complement your building's decor, the Doorphone is surface-mountable or easily recessed, flush with the wall.
